The logiJET TC8 is an 8-inch thermal transfer printer developed for industrial deployment and designed to withstand toughest demands. It is equipped with two print modules that may be fitted with any color. On request it may also be equipped with an 'unwinder' allowing label rolls to be used; an optional 'rewinder' can then reroll the printed continuous labels. The logiJET TC8 is housed in a robust metal case. This model's easy handling of consumables and simple operation orients itself on the demanding requirements inherent of industrial deployment. Thanks to the integrated PCL5c printer language, the logiJET TC8 can directly replace a standard laser printer, and the connection to SAP is thereby simple, fast and inexpensive.
